

Revised Concept

OLIVER LEWIS – U1961638

VIDEO & POST PRODUCTION

Concept Rundown

- mood boards of visual inspiration / references.
- 2-column script (1. Text/audio and 2.Describe the action)
- 12-20 frame storyboard - use bold shapes and clear indicators of movement. Presentation is key.
- style frames illustrating the visual design of the intended video.

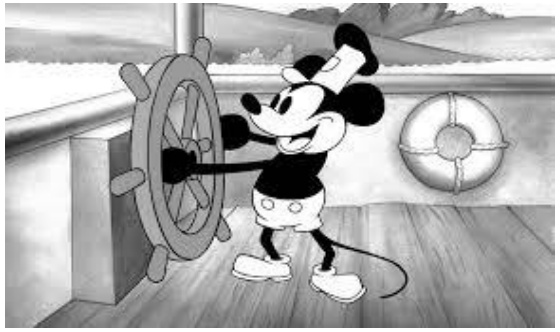

Inspirations

Gathering inspirations from a number of sources to come up with the original idea, the three main sources being: music videos, classic cartoons and pre-existing streaming services.

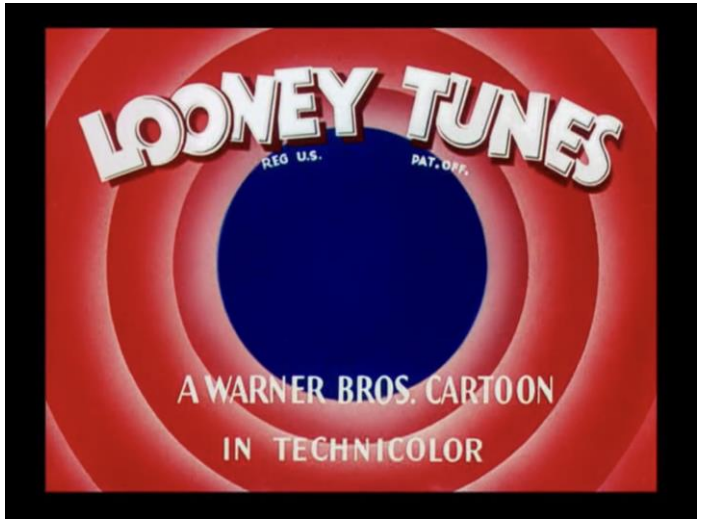

Mood board

Amalgamation of colour pallets, fonts, visual graphics, textures and layouts. Allowing for the generation of ideas for the overall and eventual look of the company.

Script

Text/Audio	Action/Description
Scene 1: Audio voice over - Bored of your regular rundown streaming service?	User/customer with a bored expression sitting watching television while camera lowers bringing them into view.
Scene 2: Audio - Up-beat music begins to play Voice over - Imagine if you could stream your favourite cartoons and music on one service	Change in emotional tone, characters expression increases to a smile as colour returns to the screen, slow zoom towards character and tv.
Scene 3: Text – “Do not attempt to adjust your television” Audio - Up-beat music continues	Change to characters point of view, looking towards the television as regular broadcast is taken over, via text appearing on the screen.
Scene 4: Text – “stay tooned” Audio - Up-beat music continues	Animated text flies in from the left and then the right telling the user to stay tuned for the advertisement they're about to be shown.
Scene 5: Audio - Up-beat music continues	Radial animation expands outwards from the television screen slowly engulfing the view of the camera.
Scene 6: Text – “Cartoons, sound tracks, theme songs, AMV’s, Music & Music videos”	Animated text drops down in order on the screen, listing the various features of that the streaming services will offer.

Text/Audio	Action/Description
Scene 7: Audio - Up-beat music continues	Transitional scene of radial circle shape animation receding inwards from previous scene.
Scene 8: Audio - Up-beat music continues	Users hand holding phone slides on screen from the left side, giving a close up of the mobile app in use.
Scene 9: Audio - Up-beat music continues	Point of view of user interaction with mobile phone, repeater animation exploding from phone when user presses buttons.
Scene 10: Audio - Up-beat music continues	Snap zoom towards mobile phone showcasing app features after user interacts with the app, zoom timed with interaction.
Scene 11: Audio - Up-beat music continues	Another radial animated transition scene, starting small in the centre of the screen extending outwards.
Scene 12: Text – “Toons” Audio - Up-beat music continues	Toons logo drops down from above the screen, while a hand holding a phone presenting the mobile app towards the camera, with animations in the background and overlayed.

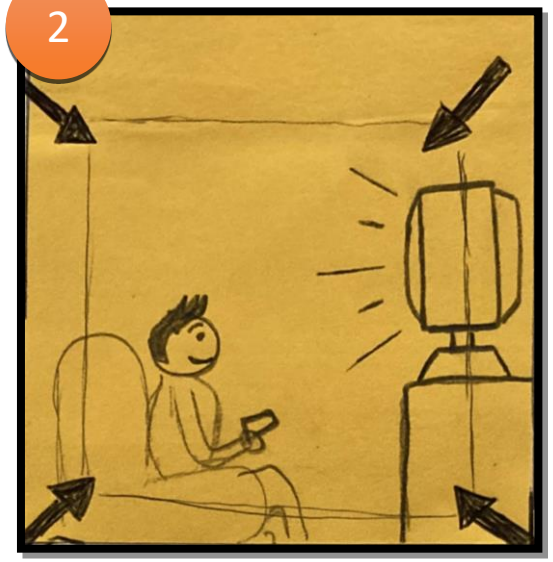

Storyboard – Frame 1-3

1

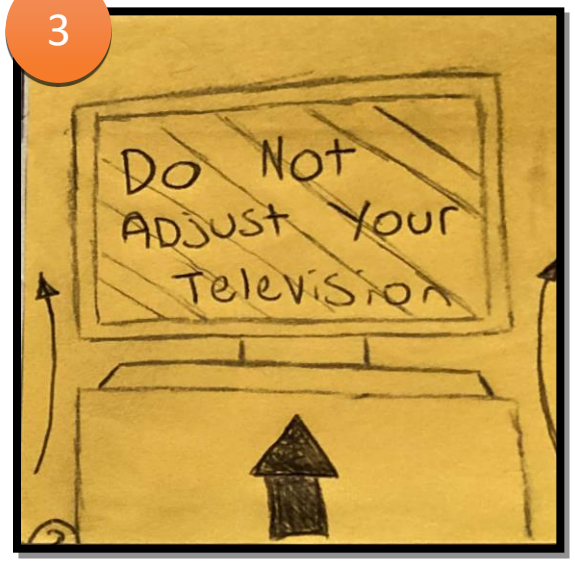

Scene 1:
Opening scene, pedestal movement, lowering the camera bringing the character and television into frame from a side on view. Black and white overlay over screen for emotional effect.

2

Scene 2:
Frame push in towards the subject slowly, overlay fades away from the bottom of as colour returns to the screen upwards.

3

Scene 3:
Change in view of scene from side on view to POV of television, slow dolly zoom towards the television screen as text appears on the tv screen.

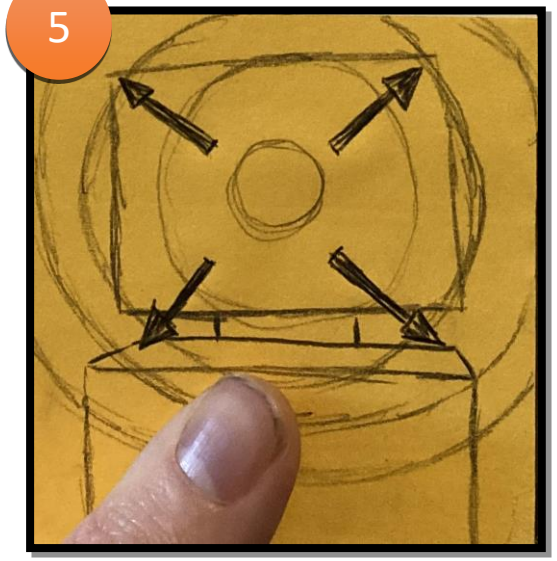

Storyboard – Frame 4-6

4

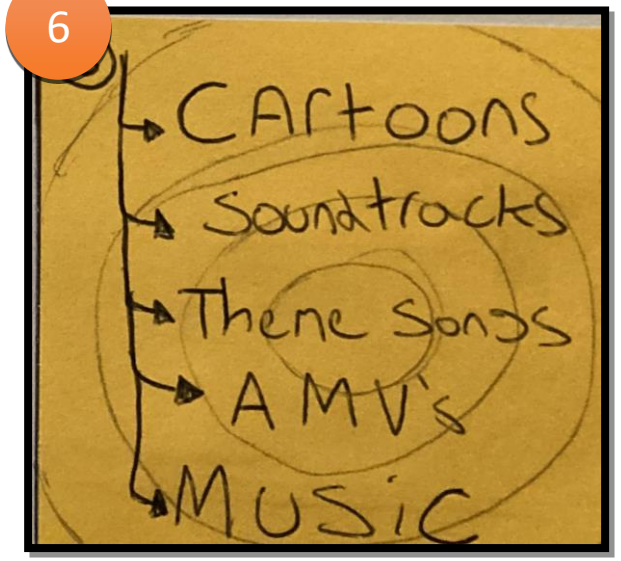

Scene 4:
Medium close up shot of television screen, continuing POV from previous scene.
Animated text flies on screen from left and right in top-down order.

5

Scene 5:
Radial animation of circles originating from the centre of the screen gradually engulfing the whole frame

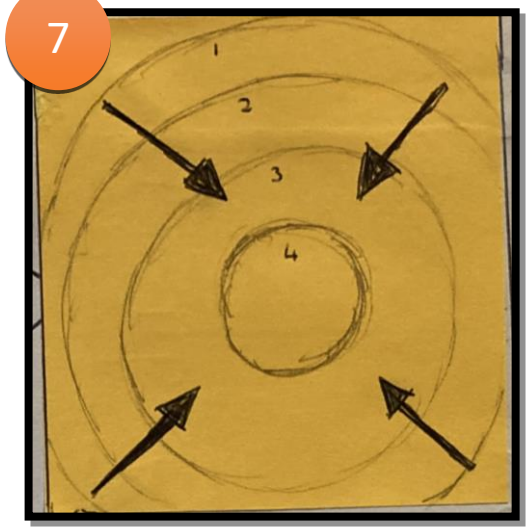

6

Scene 6:
After the animation from the previous scene has reached its apex, a top-down list of available features will appear on the screen like a drop down menu.

Storyboard – Frame 7-9

7

Scene 7:
Transitional animation from previous scene, animated circles receding inwards, fading into the centre of the screen. to transition into footage of services being used on phone.

8

Scene 8:
Arm appears from the left off screen holding a mobile phone while music plays over the top with voice over narration of features.
POV close-up of mobile phone revealing the design and layout of the app on a mobile platform.

9

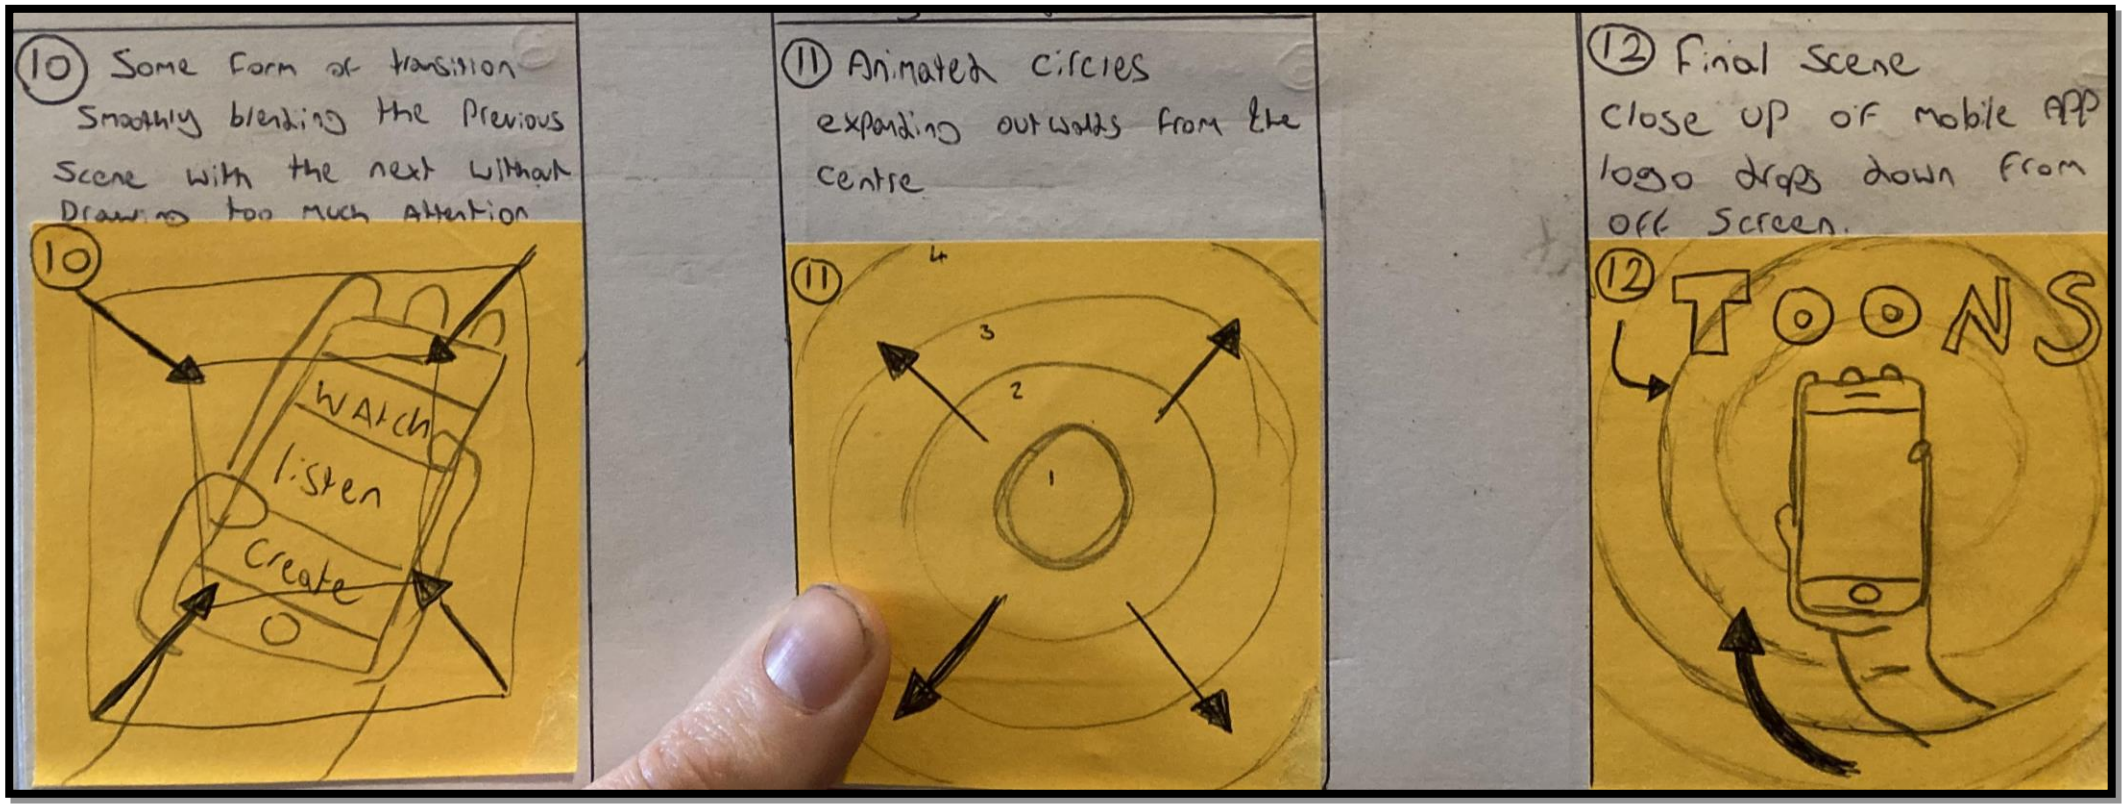

Scene 9:
Continuation of previous scene where user interacts with mobile screen, clicking an option causing animated effects to appear from the phone screen on the point of contact.

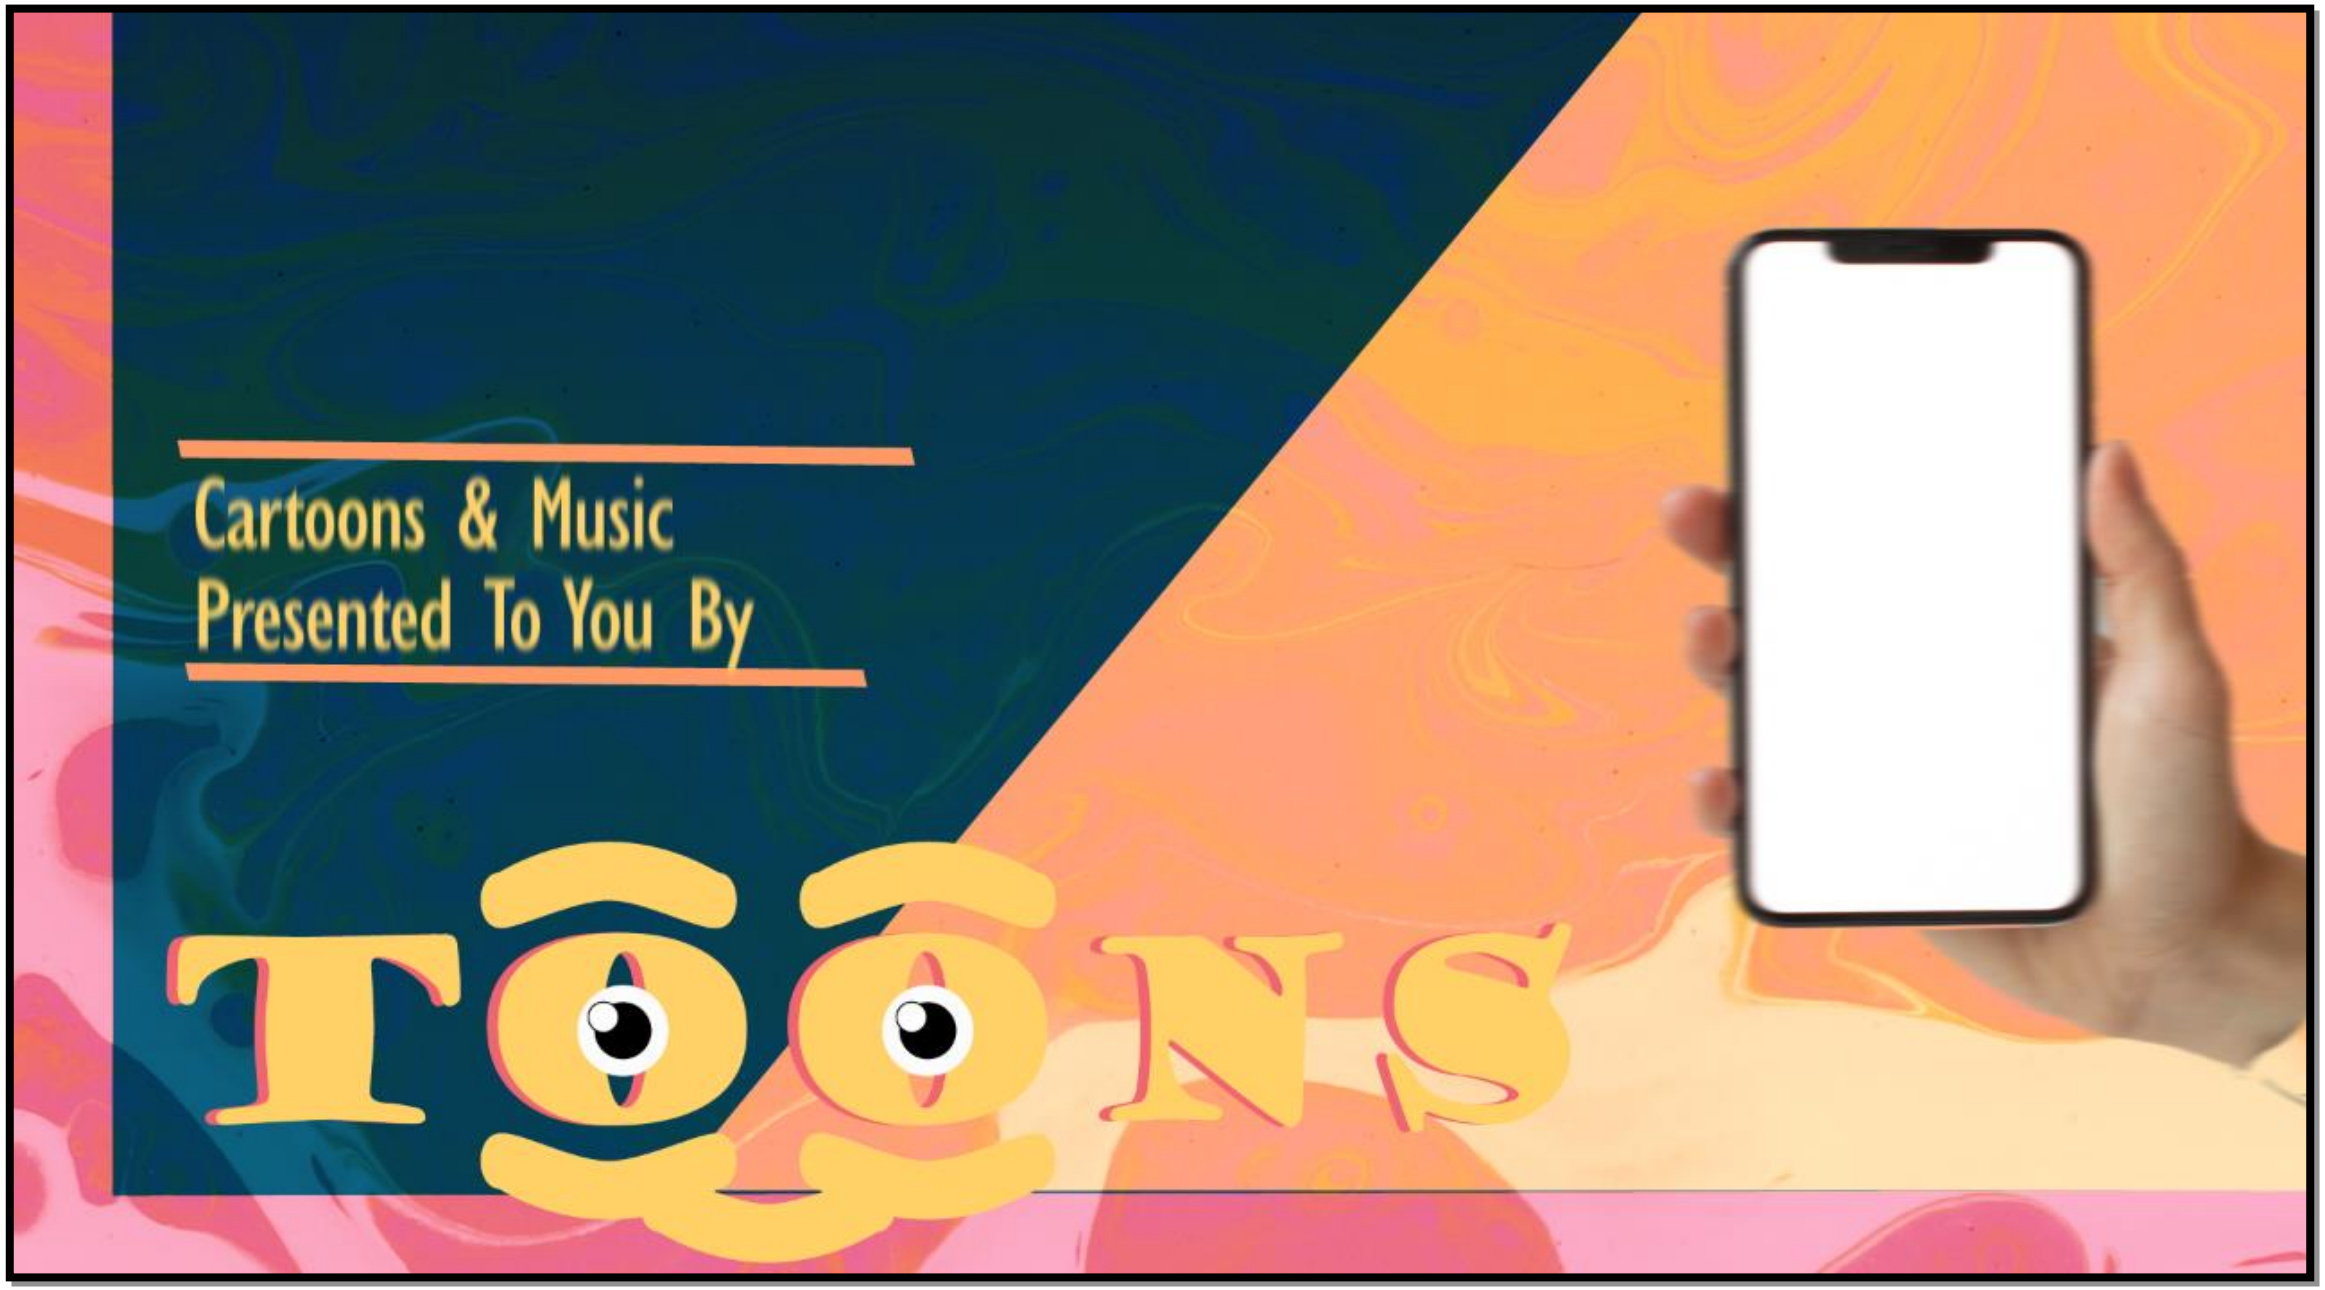

Storyboard – Frame 10-12

Scene 10:

Scene 11:

Scene 12:
